

Small Site Closures

This table lists the 85 small sites closed as of 2013 in chronological order of completion.¹ A number of these sites were cleaned up under the Formerly Utilized Remedial Action Program (FUSRAP), for which the U.S. Army Corps of Engineers is responsible for site surveys and remediation. Uranium processing sites were addressed by the Uranium Mill Tailings Radiation Control Act (UMTRCA). UMTRCA Title II sites are sites that were commercially owned and are regulated under an U.S. Nuclear Regulatory Commission (NRC) license. For license termination, the owner must conduct an NRC-approved cleanup of any on-site radioactive waste remaining from former uranium ore-processing operations. The site owner must also provide full funding for inspections and, if necessary, ongoing maintenance. Once site cleanup is complete at the uranium processing sites, DOE accepts title to these sites on behalf of the United States and assumes long-term management. In addition to the 85 small sites, five larger sites were closed including Rocky Flats, Fernald, Mound, Pinellas and Weldon Spring.

After cleanup, some residual hazards may remain due to financial and technical impracticality that require long-term monitoring to ensure ongoing protection of human health and the environment. Once remediation is completed, the DOE Office of Legacy Management (LM) becomes responsible for long-term management at Departmental sites that no longer have a continuing DOE mission. Most of the 85 small sites were closed and transferred to LM or another federal or state agency for long term stewardship and monitoring.

List of Small Site Closures by Year²

Site Name, State	Completion Year
Hallam Nuclear Power Facility, NE	1969
Piqua Nuclear Power Facility, OH	1969
Bayo Canyon, NM	1982
Kellex/Pierpont, NJ	1982
University of California, CA	1982
Acid/Pueblo Canyons, NM	1984
Chupadera Mesa, NM	1984
Canonsburg, PA	1986
Shiprock, NM	1987
Middlesex Municipal Landfill, NJ	1987
Niagara Falls Storage Site Vicinity Properties, NY	1987
Salt Lake City, UT	1989
Spook, WY	1989
National Guard Armory, IL	1989
University of Chicago, IL	1989

¹ When reference is made to a site being cleaned up or closed, this refers to active EM cleanup work being completed and the EM mission being closed at a particular site. In many cases, there are long-term monitoring or stewardship responsibilities that may continue in perpetuity and which are managed by other DOE program offices or other state or federal agencies.

² The list of closed sites is based on the EM Completed Sites Listing web site <http://energy.gov/em/downloads/completed-sites-listing>

List of Small Site Closures by Year²

Site Name, State	Completion Year
Green River, UT	1990
Lakeview, OR	1990
Riverton, WY	1990
Tuba City, AZ	1990
Durango, CO	1991
Lowman, ID	1992
Pagano Salvage Yard, NM	1992
Elza Gate, TN	1992
